

covered later.

As VIP-FLOP is completely subroutine driven, the mechanics exist here for you to construct checkers and other 8 x 8 grid games using VIP-FLOP and it's graphics as the skeleton for your own programming. In fact some of the routines were written to incorporate this very feature. The concept of a look-ahead search is an important one in computer programming and careful study of the program listing may help you to understand its intricacy. But whatever satisfaction you find in the program, I thank you for trying it, and wish you the best of luck in your experiments!
