decide how you want it to operate. (I'll tell you how
in a minute.)

My system is based on the first letter of the
function wanted. First press the CONTROL key down then
hold it down while you press a key from the following
list to call up these operations. The CONTROL is in
parenthesis to remind you to press that key first.

(CONTROL) U - Cursor Up

(CONTROL) D - Cursor Down

(CONTROL) L - Cursor Left

(CONTROL) R - Cursor Right

Scrolling is a little different. First press and
hold the CONTROL key down as before, then press:

(CONTROL) Key O (zero!) - Scroll up

(CONTROL) Key O (letter!) - Scroll down

These two are easy to remember as the number O
is above (scroll up) the letter O (scroll down). You
will probably find it more convenient to use the
special LINE FEED key to scroll up and the BACKSPACE
key to move the cursor left. Similarly, the RETURN
key performs a carriage return with auto scroll at the
